

Accessibilité web & mobile	Introduction to Flask Web Development with Python
Automating Administration with Windows PowerShell	Introduction to Human-Centered Design (UX Design)
Automation of repetitive tasks with classical and visual programming (RPA) techniques	Introduction to JavaScript - the language of the browser!
Back-End Development with Python and Flask	Introduction to software testing and initiation into the Agile environment
Blockchain Technology (1/2)	Introduction to SQL, the query language for relational databases
Breitband-Internetzugang in Luxemburg	Introduction to the Blockchain legal framework
Certified Professional User Experience – Foundation Level	Introduction to tokenization
Certified Professional User Experience – Foundation Level – Crash course	IT Foundation
Certified Professional User Experience – Usability Testing	JAVA - Advanced Java Programming
Classification of tokens	JAVA - Data Management and Databases
Concevoir une image de marque d'un produit ou service digital	JAVA - Object Oriented Programming in Java
Conteneurisation avec Docker	JavaScript
Crash Course: Introduction to UX (What – How – Why)	La connectivité à haut débit au Luxembourg
Cybersecurity Act & Technical Standardization	Le futur du web
Data Analysis with Python	Legal aspects of Tokenization
Data stewardship fundamentals	Modélisation d'une base de données
Data Structures and complexities for Big Data Processing	Non-fungible token (NFT) creation
DevOps - Gestionnaire des modifications et de la configuration des TIC	Orchestrer vos applications avec Kubernetes
DevOps Fundamentals	P3 – Fonctions, modules, bibliothèques et fichiers
Domain Name System (DNS) administration	P4 - Implémenter une base de données avec Python et MySQL
Finops Cloud Platform Cost Management	Pipeline de Déploiement avec GitOps
Foundations of Django Web Development	Pipeline de Déploiement avec GitOps
GDPR & Blockchain's immutable nature	Probability for Data Science
How to Cope with the Future AI Act	Python - Object Oriented Programming and Desktop Application Creation
How to use web services with Javascript	ReactJS
Implémenter une base de données avec Python et Mysql	Secure DNS infrastructure with DNSSEC
Industrial and Product Design	SEO for web developers and front-end developers
Initiation aux technologies du web	TCP/IP Deep Dive for Practioners with Wireshark
Introduction à la gestion des risques et MONARC	TypeScript
Introduction au Digital Design	User Experience (UX) Management
Introduction to Cloud Computing	User Experience (UX): Human-Centered Design, Research, and Management
Introduction to Computer Networks	Web3 Methods: an exploration and implementation of the new Internet
Introduction to Design Thinking
